Welcome to Eudoral

Eudora is now licensed in three ways. Sponsored Mode, Paid Mode, and Light Mode. Unless you change modes, Eudora will run in Sponsored Mode, meaning it will display ads.

We have done our best to present the ads in a vay that respects the work you do in email. By allowing Eudora to display ads, you get the full power of Eudora for free and we can still pay our bills.

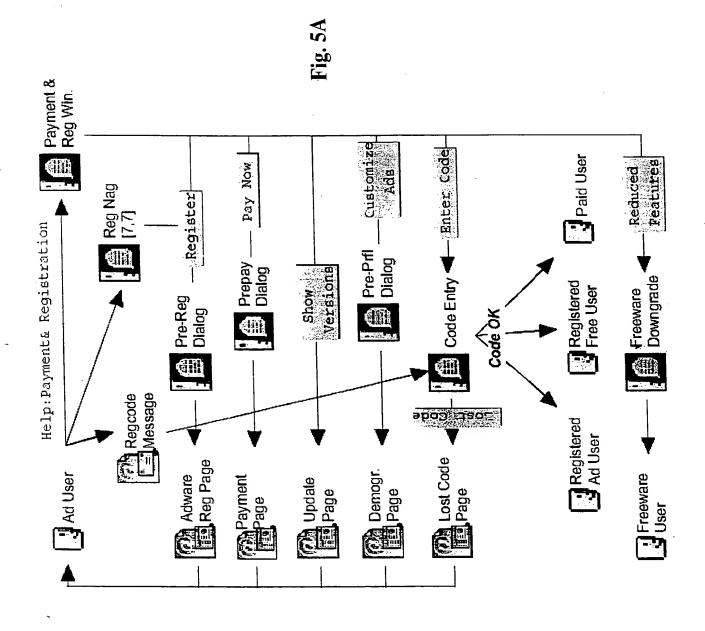

If you decide the ads are not for you wan change modes. Paid Mode shows no ads. Current Eudora Pro 4.x users will be able to upgrade to Paid Mode for free. Other users will be able to pay a license fee to go to Paid Mode. At this stage in testing, the machinary for all Mode is not fully tested, and Paid Mode is unavailable. Light Mode also shows no ads, but has many lewer.

To switch forms of Eudora, please use the "Payment & Registration" item in the Help menu. To learn more about the three modes, click on the "Tell Me. More" button below

Tell me more

	Thanks for choosing to register Eudora! You'll next be walked through a faw quick steps, as described below, before registration is complete: • Eudora will open your web browser and take you to our registration page • You'll fill in some simple registration information on the web site well then email a Eudora registration code back to you • We'll then email a Eudora registration code back to you • The next time you check mail Eudora will automatically recognize this code and display a dialog box invitting you to confirm your registration information Fadal You'll then become a registered user of Eudora. Thanks

There are updates available to Eudora

You have Eudora version 4.1. The following updates have become a since this version was released. If you'd like more information any of these updates, simply follow the links. If you'd rather you of updates, follow this.

Eudora 5.3

This is a major upgrade, with great new features like automatic.

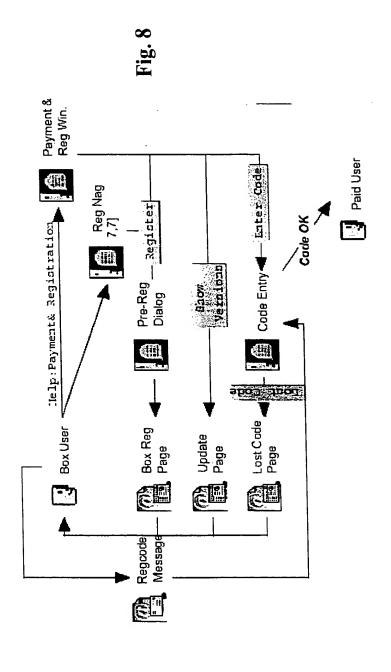

Fig. 7B

This update is mostly bug fixes. This update is free to you.

Endora 4.2

You can buy a printed manual for Eudora.

displaying ads is a requirement for the free full-featured version of Eudora. Please visit the Eudora web site for Information about how to resume getting ads. If ad downloading continues to fall Eggoro VIII eventually revert to the Light version which is less powerful Take me to the Eudora web site For some reason, Eudora is unable to download new ads. Downloading and Eudora doesn't seem to be getting ads. Invalid HTTP request (Error code 503)

Fig. 17A

Something seems to be covering the ad.

It's probably inadvertent, but Eudora has determined that you are covering up all or a significant portion of an ad. The software is designed to notify you when this happens in the hopes that you will stop covering up the ad. If you don't, this window will keep popping up (which you will probably find quite annoying)

We've always got some good stuff under development back at the home office and it's the advertising in Eudora that enables us to continue to develop the software while providing it to you for free. We've worked hard to make sure the advertising isn't annoying and we genuinely hope that you are not deliberately trying to cover the ads because they're bothering you. Of course, you can choose to pay us for Eudora by choosing "Payment & Registration" from the "Help" menuand clicking on "Paid Full Version." Or you can remove whatever is obscuring the ad.

10 K

Fig. 17B

Eudora will now revert to a less powerful version.

Eudora has been unable to download ada for quite some time and will now revert to a less powerful version. If you would like more information about why Eudora's reatures are being reduced at this time, please visit the Eudora web site. You will find information there about how the full-featured version can be reactivated.

We're sorry for this inconvenience.

Take me to the Eudoria Web site.

Fig. 17C

If you're open to helping us this way stil you have to do is click "Generate info" below people use it. We ask users for this information at rendom. 8 The list of available ads advantageously can be built from the following query:

ads = dbCon.prepareStatement("SELECT * FROM ads WHERE StartDate <= today AND endDate >= today + 30 AND AdType = "I" AND AdStatus = "A" AND ImpressionsServed < Impressions ORDERD BY ImpressionsServed ASC);

30 AND AdType = "R" AND AdStatus = "A" AND ImpressionsServed < Impressions ORDERD BY ImpressionsServed run out ads = dbCon.prepareStatement("SELECT * FROM ads WHERE StartDate <= today AND endDate >= today + ASC);

8 The time required to deliver the ads advantageously can be calculated in the following manner.

face time left for today [seconds] = faceTime[today] - faceTimeUsedToday

(Comment: Face time left for today is the number of secondes the servict can use to deliver special ads today.)

predict face time [seconds] = SUM(face Time[tomorrow], face Time[tomorrow + 1], ... face Time[tomorrow + reqInterval]

(Comment: Predict face time is the number of seconds the servlet predicts the user is going to have.)

goal show time left [seconds] = predict face time - faceTimeLeft

(Comment: Goal show time left is the number of seconds that the software provider needs to fill with ads.)

Fig. 214

```
* Targeting

while (face time left for today ) {
    if ad is not in the history {
        select ad [according to target = today]
        face time left for today -= ad.showFor
    }

next ad

while (Goal show time left ) {
    if ad is not in the history {
        select ad [according to target]
        goal show time left -= ad.showFor
    }

Befault values:
    reqInterval = 1 day.
    facetime = 30 minutes
    facetime = 30 minutes
    faceTimeQuota is ?
    histLength = 31 days
```
